NORTHERN INDIANA SAND-GROWN GLADIOLUS BULBS

1 9 3 9

WHOLESALE PRICE LIST-CANCELS ALL PREVIOUS LISTS-SUBJECT TO PRIOR SALE

For us 1938 was an ideal year for growing Gladiolus and we can truthfully say that we have the best grade of bulbs we have ever grown - clean, golden high-crown bulbs, grown from young stock, free of disease and thrips. Our Indiana State Inspection Certificate number is 304. A copy of the Inspector's report on file states as follows: "Bulbs in very good shape." "Apparently no Gladiolus Thrips present." We have never had any Gladiolus thrips or serious diseases in our Gladiolus at any time in the past and you can bet we never will, if care and attention has anything to do with the matter.

Bulbs that have already been shipped this season have found great favor with our customers and many of them have written letters to us complimenting us on the high quality and clean appearance of our stock. One customer writes: "Glads received, they are the best I have ever seen." Another writes: "The bulbs received last Saturday 7th, and they were nice and clean. Thanks for the extras which you were very generous with." These are only a few of our satisfied customers but we feel justly proud of the fact that our effort to give quality stock has been so admirably appreciated. It is a pleasure to be able to supply the trade with what is expected and more. Every precaution is taken to sell you bulbs that are right in every way. Now, read our list over carefully and see for yourself that our prices are also right and in reason.
